

(U) Tier 2: Joint Readiness Experimentation (J-REX)

What We Aim For

Validate the operational readiness of foundationally proven technologies in austere, contested environments.

Joint Readiness Experimentation (J-REX)

How We Hit

Conduct complex experimentation events focused on the evaluation of joint interoperability, operational effectiveness, and military utility.

These events confirm innovative technology's capacity to effectively function within a network and against varied threats, creating data points used in the development of a Final Analysis Report.

(U) Tier 2: Joint Readiness Experimentation (J-REX)

Objectives: Joint Interoperability, Operational Effectiveness, and Military Utility
